

Lane restrictions information

Our request to all expressway users: Please drive safely.

During two-lane restricted use

The four inbound and outbound lanes will be reduced to two lanes (two-way traffic) during deck slab replacement.
 ※ The construction area will be off-limits to traffic until all deck slabs are replaced and paving is completed.
 ※ Construction dates may be changed due to weather or other factors.

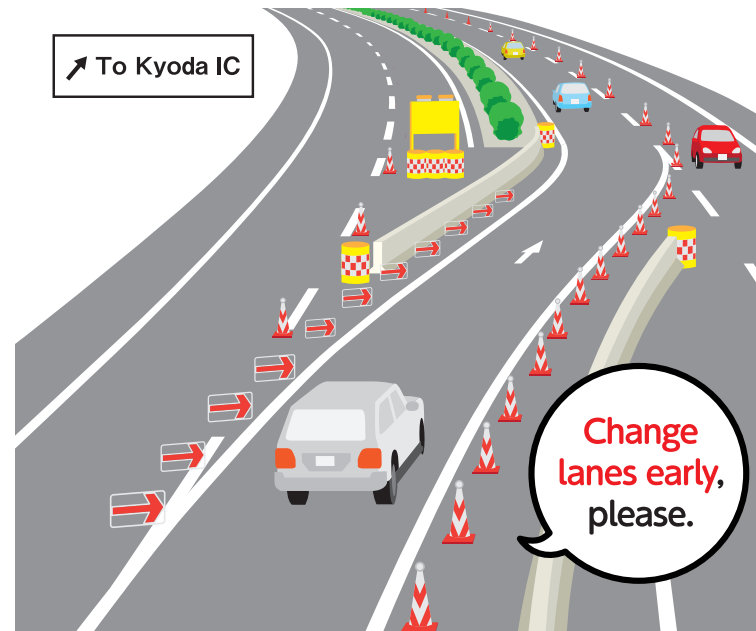

Deck slab replacement work concept

Because damaged deck slabs are removed, the road surface is temporarily missing. Replacement work is not complete until factory-manufactured deck slabs are installed and the surface is paved. As a result, traffic restrictions cannot be lifted until the deck slab replacement and paving operations are finished.

When changing lanes, change early and allow yourself plenty of time. Forcing your way into another lane is dangerous.

Just before the area with traffic restrictions, two lanes will be merged into one lane. Forcing your way into the lane at the last minute is **very dangerous**. When changing lanes, change early and allow yourself plenty of time.

Watch for traffic congestion!

Okinawa Expressway

Meijiyama Second and Third Bridge renovation work

All-Day Two-Lane Restrictions

2015

1/8 [Th.] → 3/31 [Tu.]

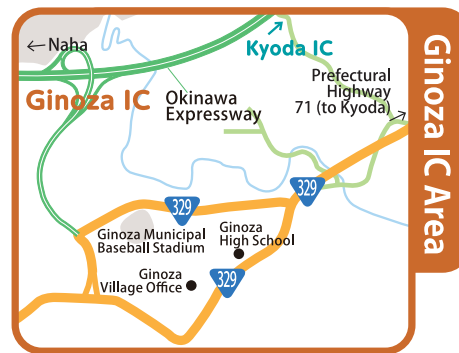

Traffic congestion may occur, particularly in the mornings and evenings. Please factor potential delays into your travel time.

Information on peripheral roads for Okinawa Expressway Ginoza IC ↔ Kyoda IC two-lane restrictions

2015 1/8 (Th.) → 2015 3/31 (Tu.)

During restrictions, **traffic congestion may occur**, particularly in the **mornings and evenings**. We suggest using **National Highway 329 ~ Prefectural Highway 71** as peripheral roads. We apologize for the inconvenience, and request your patience and cooperation.
